Hodge:

[REDACTED]

[REDACTED]

CHS does not have to pay anyone at LMU and will keep the money for himself/herself. CHS implied to Hodge that the money will be going to LMU.

—

Figure 1. A schematic diagram of the experimental setup. The light source (laser) emits a beam of light that passes through a lens and a beam splitter. The beam splitter splits the light into two paths: one path goes through a polarizer and a lens, and the other path goes through a lens and a polarizer. The two paths converge at a camera.
